His Face Reveals All of Characteristics and Habits.

Sweethearts Can Detect Inner Actions of Lovers.

MUCH DEPENDS ON HIS NOSE

Big Nose Always Means a Big Man, Physicians Say.

Physiognomy Is Latest Method of Character Reading.

"I wouldn't encourage him," said a Topeka girl's mother as a young man walked down the front walk after calling on her for the first time.

"Why, mamma! How can you help liking him?" the daughter asked. "He has wonderful eyes."

"I was thinking more about his nose," said the mother. "Now, dearie, do not think that I am trying to intimidate him. He is just the kind of a fellow who would fall in love with you quickly and a few weeks later fall in love with some other girl just as easily. He is fascinating and is full of idealism. But he has no character, anything that will keep him plodding toward his ideals. If something happened to force him to shift for himself and not depend upon others, he would be a hopeless failure. And then, suppose you were to marry him, he would never be at home nights."

She knew Physiognomy. No, mamma hasn't been shadowing the young man. The explanation of the conversation is easy. The watchful Topeka woman is a newly converted disciple of physiognomy—face and form reading. So if the entertaining young swain who strolled down the front walk on Topeka avenue is mystified at the frigidity of the voice of mamma's daughter, over the phone the next day he can easily solve the problem by standing before a mirror and comparing his defects and strong points with the above diagram and illustration.

Physician's Explanation. Says a Topeka physician who has made a study of physiognomy: "Supposing this young man had an upper lip which was a perfect 'Cupid's bow,' mamma would know that he easily fell in love and would just as easily fall out again. If his chin is narrow and his face, especially his nose, so lacking in squareness, she would know that he was not naturally over-conscientious. That he was refined would be shown by a high nose, broad and well rounded at the tip. If the nose is humped instead of straight, the sterner qualities are in evidence.

"No two faces are shaped alike. If there was, it would mean that the forces which shaped them were alike and the character of the two would be the same. The exact differences in character can be found by a measurement of the shape and discovery of the law which governs form."

Rules. Following are other rules laid down by the local physician:

Other things being equal, a big nose indicates a big man, a small nose a man of small capacity and interest. The quality, the fineness of the skin and tissue must always be taken into consideration. The fineness of the quality may show a more perfect development with less extensive physical measurements.

The convex nose, the "Roman" nose, or the nose with a hump, is usually the largest type of nose. It is associated with the greatest power and the largest aspects of character.

The straight nose indicates refinement, a capacity for the arts rather than for the deeper sciences, and probable sensuousness.

Where the straight nose is short and thick the tendency is toward ornamental and constructive work in small undertakings. The higher art and philosophy go with the longer nose. The concave nose, the nose that curves in from the tip to the forehead, is the typical nose of the infatuated, the idiot and the undeveloped. At best it indicates a pure and capable but weak character.

The nostrils should be horizontal. If it slants upward from the lip it indicates immature and childish tendencies. If it slants downward it indicates a melancholy or malicious character.

A large nose and nostrils induce deep breathing. This accelerates the motion of the blood and quickens the mental as well as the physical powers.

Tale of a Long Nose. A long nose protects the face and indicates cautious mental habits. A nose high above the line of the cheeks and projecting forward, as though intent upon exploration, discloses a faculty for the understanding of human nature. If the point of such a nose is sharp and thin it means that the interest in human nature is confined to petty trifles and the person is merely "nosy."

Height and breadth of the nasal bones just below the bridge is the sign of "veneration." This faculty usually takes the form of deference to law, order, religion and authority. Its absence is associated with discourtesy, pertness and disregard of the rights of others.

Height and breadth of the bones just above the sign for veneration indicates executive power or natural leadership.

Fullness and breadth of the sides of the nose just above the nostrils is caused by a development of the nutritive system, and indicates a capacity for getting the necessities of life. It is called the sign of acquisitiveness, and manifests itself commonly in business ability or the power of acquiring whatever use one desires.

Fullness of the sides of the nose just above the point and below the bridge indicates constructiveness.

If the tip of the nose is wide for its height it means that ideality or imagination is well developed. The fineness and clearness of the skin must always be taken into account in reading this sign and those connected with it.

Too Many Highballs. If the wide tip is rounded at the corners it indicates idleness. If there is nothing to do with the bulbous, discolored nose, the sign of too many highballs.

A downward projection of the tip of the nose indicates a faculty for mental imitation. This faculty carried to ex-

HOW THE PHYSIOGNOMIST MAPS THE HUMAN FACE

- 1-Conscientiousness.

How to Study a Man's Characteristics.

cess might indicate lack of originality, but its absence is a sure sign of unprogressiveness.

Fullness of the nose and forehead indicates selfwill. Not balanced by other qualities, it indicates selfishness, but its absence would indicate timidity and irresolution.

A "pug" nose shows a lack of reasoning power, and is associated with quarrelsomeness or pugnacity. If the pug nose is blunt, look for coarseness and brutality; if it is sharp look for fretfulness and scolding.

The "Greek" nose, where the forehead and back of the nose make an uninterrupted straight line, is not a normal type. Found in real life, it would indicate a convoluted will and excessive stupidity.

The "up tilted" nose, which technically belongs to the concave class, may be simply an indication of some childish traits, such as vivacity and abandon, but is associated with refinement, wit and brightness. It is the nose of the coquette.

The "concave nose" belongs to the concave class. It is short and round and either straight or slightly concave. It is hard to put our greatest singers in the undeveloped class, but it is physiognomically necessary. Where the osseous system is dominant the softer tones cannot be produced.

The "square built" man. The square built man thus becomes in a sense the highest type. Bone crystals are square. The more bone a man has the squarer you may expect him to be; the more integrity, morality and comprehension of the greatest truths will he exhibit.

The accompanying diagram and illustration shows attractive and unattractive character.

Study it, girls, study it—then look him over—look him over.

HAS TWO WHITE WAYS

Hays Light Plant Volunteers Power; Dean of Women Controls Switches.

Hays, Kan., Aug. 14.—Boosting Hays and the Normal has begun. The first big thing of a series of big things which will boost the city and its state institution is the proposal of the Hays Electric Light company to furnish free of charge to both the city and Normal the "juice" for lighting Juanita avenue and Normal avenue westward from Chestnut street. This will make both these streets in reality white ways. There will be eight lights to each block. Each white way will be five blocks long. This will make eighty lighting stations. The approximate cost which the light company saves the city and the Normal school is \$110 per month. It will be necessary, however, for the cost of erecting the standard to fall upon some other shoulders than the electric light company and it is an assured fact that the citizens, the town and the Normal school and its friends will set up these standards on which to place the lights. Of course the big cost of maintaining the white way is the cost of electricity, and its initial cost is comparatively small.

One of the interesting things which this proposal has brought out is that the lights for the white way will be on a separate switchboard at the light plant and the control of this switchboard will be in the hands of Miss

Clark now has a position with the Garlinghouse Realty Co.

Guy Wood has accepted a position as stenographer with Crane & Co.

Mr. Evans, who came from Colorado and who has a stenographic position with the Rock Island at Herington.

Miss McCosh is stenographer to Mr. Woodward.

Mr. Kosier has gone to Chillicothe, Ill., to a stenographic position with the A. T. & S. F. Mr. Kosier taught school before taking up stenographic work.

Miss Pearson is stenographer with the Knights & Ladies of Security.

Mr. Lunger is again clerk and stenographer at the Central Y. M. C. A.

Messrs. Swanson, Dustin, Harrison, Gregory, Thompson, Barber, Swenson and Miss McMahon have recently accepted positions with the A. T. & S. F.

Miss Irwin is working for the Santa Fe Watch Co.

Miss Martz is stenographer for Waters & Waters.

Mr. Ruppel has accepted a stenographic position in the office of the passenger agent of the A. T. & S. F. Mr. Ruppel was previously employed at the State House in the department of agriculture.

Misses Theuerling, Wallace, Bennett, Newberg, Jordan and McKinley have been doing temporary work recently.

It is an interesting fact that Gregg Shortland, Rational Typewriting, Twentieth Century Bookkeeping and Palmer Penmanship have been adopted by the Standard Commercial school exhibit at the Panama-Pacific Exposition at San Francisco. These texts are all used in our school.

BIG G.A.H. TOURNEY

One Thousand Shooters Are Headed for Chicago.

C. N. Wray Will Represent the Topeka Gun Club.

C. N. Wray, local representative of the National Cash Register company and one of the best known members of the Topeka Gun club, will leave tonight for Chicago to shoot in the Grand American Handicap tournament next week.

Chicago, Ill., Aug. 14.—Chicago's grand annual handicap, the annual trap shooting classic of the world, which gets under way in Grant park Monday morning will see a field of over 1,000 gun toters participating. This was assured when Elmer Shaner, manager of the International association, upon his arrival here announced that the original entry of 805 amateurs would be swelled by the addition of 100 post entries and the nominations of 98 professionals.

In point of number this exceeds twice over the largest field that ever competed in a Grand American.

The field of shooting will represent every state in the Union and will be made up of men who can write checks in seven figures, men who count their wealth by the yard, men who count their youth who boast nothing more than a lot of nerve and ambition. It will be a cosmopolitan gathering such as few sporting events can draw together.

Major William Hale Thompson will officially open the big tourney Monday morning. He will fire the first shot in a week and will be devoted to busting clay targets. It is estimated that about one million shells and an equal number of clay birds will be used.

Elmer Shaner, manager of the tournament, who is in charge of the grounds, has been in charge and probably will be the biggest he will have to handle for several years to come.

W. E. Phillips, chairman of the board of directors, has dedicated the traps. He banged at a few of the clay birds and pronounced everything O. K. Several other shooters have enjoyed a practice workout.

REDS OFFERED TO FEDS.

Weeghman Turns Down Chance to Break Up National League.

Chicago, Ill., Aug. 14.—Control of the stock of the Cincinnati National league club was offered to Charles Weeghman, president of the Chicago Federals, for \$255,000 Friday but the offer was declined it became known today.

Weeghman said that Charles B. Bultman a broker of Cincinnati, who is acting for Warren N. Carter of Pasadena, Cal., a prospective buyer of the club, displayed certificates for 51 per cent of the stock.

"Bultman assured me that he could deliver the goods," Weeghman said, "but when I did not warm up to the proposition it was suggested that we get President Gilmore of the Federal league at New York. Mr. Bultman had a talk with him, but what he was told I do not know."

"It was not a new thing to President Gilmore, however, as the league was offered the controlling interest in the Cincinnati club a month ago. At that time the offer was turned down, as we don't wish to break up any league. I still believe in the sentimental part of the game and that is why I would not listen to the offer of Mr. Bultman."

That the controlling interest in the Cincinnati club will be sold, however at an early date was indicated by the fact that the deal would be closed next week.

APPS. AGAINST THE G. O.'S.

Big Battle Will Be Staged at Santa Fe Park Tomorrow.

Santa Fe against Santa Fe will be the order again tomorrow afternoon at Santa Fe park when the Apprentices and G. O.'s are to meet for the second game of their series. The Apps. and G. O.'s play a series of games each summer and this season the Apps. have more interest in them than ever before.

Last Sunday the first game was played and after having allowed the G. O.'s to pile up 7 runs in the first inning the Apps. won the game by their knitting, and in a ninth inning rally won the contest. Both the Apprentices and G. O.'s have won a majority of their games this season and both teams have been practicing hard all this week for tomorrow's contest.

The line-up for tomorrow's battle will be as follows:

Apprentices	Position	G. O.'s
Elegance	2b	Montgomery
Lux	3b	Wall
Isacron	ss	Marshall
Heeler	ss	P. Novers
Hamer	1b	Herring
Mulligan	1b	Oberer
Peterson	1b	Kistner
Simpson	1b	Wright or Neville
Bielhi	utility	

SPEED KING KILLED.

Son Won Race That Brought Death to His Father.

Spirit Lake, Iowa, Aug. 14.—R. E. Donaldson, of Milford, Iowa, owner of the racing car Emden, which won a prize at Indianapolis and one thousand dollars at Omaha, was instantly killed while driving that car in the automobile race here Friday afternoon.

Mechanic Wilcox probably was fatally injured. Two sons of the deceased won first and second place in the race after the death of their father, not knowing he had been killed.

Welter Champion Wins.

New York, Aug. 14.—Angus Ratter, of New York, who won the national amateur welterweight championship in San Francisco this year, defeated Kid Alvin of Akeley, in a ten-round bout at Far Rockaway Friday night. Ratter weighed 144; Allen 142 pounds.

"Kaiser" Wilhelm an Umpire. Baltimore, Md., Aug. 14.—Irvin (Kaiser) Wilhelm, pitcher of the Baltimore Federal league team, has been appointed an umpire in the same league.

Wolves Get New Pitcher. Wichita, Kan., Aug. 14.—Pitcher William Powers of the late Decatur team in the Three-I league, has accepted terms with the Wichita Wolves. He will join the team at once.

DRIVES AND PUTTS FOR TOPEKA GOLFERS.

By E. W. Wingart.

After several days of experimenting one of the prominent members of the Shawnee Golf club announced with an air of finality that a pipe was the only thing for a golf course. "I tried smoking cigars," he told his friends, "but the smoke got into my eyes and I couldn't drive well. One day I tried a pipe and it's just the thing. Just what the practice is in this respect in Scotland no one seems to know."

The program for the state invitation golf tournament to be held September 23, 24 and 25 on the Country club course will be out next week. The club members expect to have one of the largest and best tournaments ever held in the state.

When Grantland Rice wrote his golf poem "Rubat of a Duffer," he probably did not know that he was hitting upon the maestro of trouble on the Shawnee course. Here's the poem:

Some time I think that never looks so small as when I put the ball. For though I putt and putt and putt and putt The ball will rarely ever fall.

A party of Country club players including Catlin, Hansen, Bartlett, Peebles, and Tom Frost went to Emporia last Sunday for a match. The Topeka team came home winners and reported that they had a great match. Peebles broke a record for the course and "Bing" Bartlett claims that he made one of the longest drives of his career. "Bing" says the ball went almost 300 yards.

A great many beginning golfers have considerable trouble in mastering the upright swing (the club over the shoulders) and as a result most novices use what is known as the flat swing (the club below the shoulders). With this swing it is easier to hit the ball but the trouble lies in the fact that not all clubs are built so this swing can be made perfectly. George Duncan, a Scotland expert who has been called the greatest golfing genius of the century, is a great believer in the upright swing. He does not think that any player can endure for long in first class golf these days and he is decidedly successful as he is already a member of the Royal and Ancient Golf club. He believes that this system means everything to accuracy and direction and while granting that the flat swing may be more neutral, is convinced that the upright method is best in the long run. He has tried both.

Alex. Smith, who has charge of the Wykagyl golf course in St. Louis, delivered the following lecture the other day to a man who was having trouble with his drives:

"The average amateur tries to get too far in his drive and often sacrifices direction for distance. The correct straighter ball is much more serviceable than the long drive that is in the rough three times out of four."

"If you are always sure of getting a drive of only 190 yards every time, but a ball that is straight down the course, it will be of much more good to you than the long drive that is half the time in the rough."

"No one need be ashamed of a 190-yard drive. If his shots from the tee average this he will drive as far as any man need to on a golf course. In these days of scientific trapping it is the player who handles his iron shots the best that wins the championships. A well-played approach is better than a mighty swipe from the tee."

The fascination of the game of golf that has gripped so many Topekan recently is well expressed in the story of a certain Scotch clergyman who after a hard day's golf during which some sulphurous expressions escaped him, remarked to his companion, with deep sigh: "Eh! Mon, I maun gee it up."

"What, gee up gow?" his friend exclaimed.

"Aye, mon, not gowf, but the meenistry."

FOR TORRENS LAND ACT

Commission on Uniform Laws Adopts U. S. Guarantee Measure.

Salt Lake City, Utah, Aug. 14.—After having been under consideration for ten years by the commission on uniform state laws, the Torrens land registration act has been adopted by the conference by a vote of 17 to 7, with Illinois, Kansas, Maryland, Massachusetts, Nevada, Rhode Island and Wisconsin voting in the negative.

The act does away with abstracts of title and provides that the state shall guarantee the title. The action of the conference constitutes a recommendation of the act to all state legislatures and is regarded as the most important action of the conference in its twenty-five years' existence.

Newcastle-on-Tyne, England, takes its name from a castle which was erected on the banks of the Tyne in 1080.

NORTON ON ABOOM

Owens Light and Water Plants—Planning Sewer System.

More Building Than in Past Several Years Combined.

Norton, Kan., Aug. 14.—Norton and Norton county are experiencing their share of prosperity from the big wheat crop just harvested. The threshing outfits are at work. Reports are coming in that the yield is 20, 25 and in some cases 30 bushels an acre. The county has more than an average acreage planted to corn, and if the frosts keep off for six weeks or two months the yield will be the largest in the history of the county. The ground is down to a good depth, and there is water running in the system where they have been dry for years. The farmers say it means much to them in the years to come.

With big crops in 1915 the people of Norton began seeing daylight, said one of her pioneer business men. This year the county has seen bigger crops raised and the town is enjoying a building boom than for the last several years combined. Improvements in the county have been made in the building of better grades of materials. Among the new improvements is the new sewage system of cement and brick, 80 by 115 feet, of Paul Broquet, at a cost of about \$15,000. It has been leased to Kent & Son, of Goodland.

The Farmers' elevator of 20,000 bushels capacity, is nearing completion.

That Norton is doing something in the building line mention is made that John Kershner has sold a carload of plumbing goods here since March, last. Norton is going to have a system of sewerage, which will cover about three-fourths of the town. The contract has been let to a Denver firm for \$42,900. It already has the systems of water and electric lighting. On account of these splendid improvements many new families are locating here, some of them buying and others building.

Norton has scores of pushing boosters. There is Dr. C. W. Cole, who is the enthusiastic good roads booster and is president of the Rock Island good roads highway. Her ice plant, the wholesale fruit and produce house of Whitteker Bros., of Topeka, the flouring mill, the foundry and machine shops, and auditorium are enterprises which her boosting commercial club has taken an active part in obtaining for the town. Besides there wasn't any let-up on the part of her people until they secured the state tuberculosis hospital. It is already in use and this year will witness additions to this state property.

There is Dr. W. C. Lathrop. He has pushed alone until now he is the builder and owner of a private hospital, entailing an expense of about \$15,000.

Norton has a population of about 2,500. It has one daily paper and four weeklies. There are few towns this size that can boast so many good papers. The daily Telegram is a necessity, and the Norton people look for it every afternoon. W. E. Garland has made a success of his daily, and every day the Telegram and Beloit Call are the only daily publications in the town.

It is prepared from the healing Pine Balsam, Tar and Honey—all mixed in a pleasant, soothing Cough Syrup called Dr. Bell's Pine-Tar-Honey.
